_ - 1 ·

- 1. Applicant should update the status of the parent applications mentioned in this file.
- Claims 1-3 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6, of U.S. Patent No. 5,582,331; claim 5, of U.S. Patent No. 5,704,518, and, claims 1-3, of U.S. Patent No. 5,934,506. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the patented claims contain at least the nexus of the backwall having a reduced diameter allowing freedom of movement, and thus afterflow drool prevention.
- 3. Claims 1-3 are rejected under the judicially created doctrine of double patenting over claims 1-6 of U. S. Patent No. 5,582,331, and, claims 1-3 of U. S. Patent No. 5,934,506 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: The apparatus, and /or the method of having a reduced diameter backwall allowing freedom of movement, and thus afterflow drool prevention.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible

harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory L. Huson whose telephone number is (703) 308-0858.
